As someone who travels a lot, XM satellite radio is a huge help to me. Without it, I would not be able to hear traffic and weather reports for the cities I am going to. It is dangerous to focus on changing the radio instead of driving, and XM remedies this problem. XM lets me hear what I want to when I want to, and much of the programming is unavailable on traditional radio. Please respect the consumer's right to have a choice and reject NAB petition 04-160.
